PROFILE

I'm the curious perfectionist with an intense eye for detail. Learning isn't just a task, it's a continuous journey that brings me great fun and a deep sense of happiness. The world of programming, in particular, feel for me like a extended playground. Much like a child let loose in a candy store. The dynamic nature of this field keeps me motivated to constantly push and test my boundaries. My curiosity and preciseness are an internal part of how I approach every task. My adaptability and quick learning look forward to embracing new challenges and further enhancing my abilities as I continue to grow both personally and professionally.

May 2022

- Creating websites in WordPress system.
- Inserting and updating data in the database in customers websites.
- Development of front-end skills.

PORTFOLIO

Prosta Matura

During my time as a high school graduate this year, I faced a challenge – there wasn't a comprehensive platform consolidating all the exam tasks in one location. Driven by this need, I took it upon myself to create Prosta Matura.

Would You Rather

App was made for my friends' group to keep us entertained during school breaks. I take pride in it because it brought us much laughter and enjoyment while playing the simple "Would You Rather" game.

INF.03 Exam Repetition

Website built with a support of Lubuscy Zawodowcy scholarship. This is a quick information summary of one of the polish technician exam INF.03. It was very useful for me and my friends that were exercising before the exam.

Real Chat App

Simple example of real chat app - my first bigger project. I encountered and solved various errors that were new to me. It allows people to exchange messages instantly as if they were speaking face-to-face.
